Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on *September 14, 2006* has been entered.

1. Claims 1-4, 6-11, and 23-25 remain for examination.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4, 6-11, and 23-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 23, it is not clear what difference results from writing modified values into a second plurality of registers instead of writing modified values into the first set of plurality of registers (in terms of using the written modified values).

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent

Art Unit: 2111

granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-4, 6-11, and 23-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Narad, U.S. Patent No. 5,287,503, cited in the previous office action.

The rejection is respectfully maintained for the reasons set forth in the previous office action incorporated herein by reference and as for the modified values can be written into any plurality of registers, such as a second set of plurality of register, instead of writing to a first plurality of registers.

6. Applicant's arguments filed September 14, 2006 have been fully considered but they are not persuasive.

Applicant argued that the reference does not teach writing modified values to a second plurality of registers different from the first plurality of registers.

As the values can be written to any plurality of registers, writing to a second plurality of registers does not arise to a patentable distinction.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tsubota taught a method of read-modify-write status register bits.

Dwyer, III taught a method of atomically changing selected bits within a register.

Derr taught a method of bit granular write of control registers.
